

Orchestrator Studio 201 9.2.8

CONTENTS

Introduction	5
Logic Extensions	7
Logic Extensions Overview	7
About the Logic Extensions Design Page	10
About the General Information Section	11
About the Logic Extensions Design Page Side Panel Section	11
About the Structure View Section	12
Data Structure	12
Variables	17
Logic	20
Test	51
Logic Extension Example - Assignment Block	54
Enter the General Information	54
Enter the Data Structure Information	54
Enter the Variables Information	56
Enter the Logic Information	58
Test the Logic Extension	68
Logic Extension Example – Business Function and If Else	70
Enter the General Information	70
Enter the Data Structure Information	70
Enter the Logic Information	73
Test the Logic Extension	80
Complete Exercise 1 –Logic Extension – Concatenation Exercise	80
Logic Extension Example – Table I/O, While Loop and Array Function	81
Enter the General Information	81
Enter the Data Structure Information	81
Enter the Logic Information	84
Test the Logic Extension	91
Workflows	93
Workflow Overview	93
Workflow System	93
Workflow Engine	93
Process Definition	93
Process Instance	94
Process Version	94
E1 Workflow Features	95
Workflow Design	96
About the Workflow Design Page	98
About the Design Page Icons Section	98
About the General Information Section	100
About the Workflow Design Page Management Icons	101
Workflow Toolbar Tasks	107
Report Tasks	107

Business Function Tasks _____	108
Local Process Tasks _____	109
Halt Tasks _____	110
Information Tasks _____	111
Action Tasks _____	114
Orchestration Tasks _____	116
Workflow Message Recipient Configuration Considerations _____	117
Electronic Mail Components _____	117
Work Center _____	117
External Mail _____	117
Address Book Mail Preference _____	117
Distribution Lists _____	118
Structure Types _____	118
Group Processing _____	118
Hierarchical Processing _____	118
Additional Routing Features _____	119
Escalation Rules Overview _____	120
Workflow Delegation and Monitoring _____	121
Delegation Overview _____	121
Managing Delegation Records _____	121
Predefined Delegation Lists _____	121
Create Delegation Records _____	122
Delegation Monitoring _____	122
Workflow Monitor _____	124
Terminate, Suspend or Resume Process Instances _____	126
Create a New Item Approval Workflow Process _____	127
Overview _____	127
Data Structure Examples _____	127
Create Workflow _____	130
Add Data Structures _____	130
Key Data Structure _____	130
Additional Data Structure _____	130
Add Transition Conditions _____	131
Add the If Approve Condition _____	131
Add the If Reject Condition _____	133
Add Tasks _____	134
Add Workflow to a Logic Extension _____	144
Enter the General Information _____	144
Enter the Data Structure Information _____	145
Enter the Variables Information _____	146
Enter the Logic Information _____	146
Create Orchestration _____	152
Test the Orchestration _____	155
Complete Exercise 2 – Workflow Exercise _____	162
Delegate Workflow Exercise _____	163
Create Predefined Delegation List _____	163
Run Orchestration that Calls Workflow _____	164
Delegate Workflow via My Workflow Monitor _____	165
Error Handling and Data Validation _____	171

Error Handling and Data Validation Overview	171
Error Handling	171
Error Handling Example	173
Form Request	173
Build the Connector Request	173
Create the Orchestration	176
Transformations	178
Define Error Handling	179
Define Outputs	180
Test the Orchestration	181
Send Add Item Orchestration Results in a Message	182
Build the Message Request	182
Build the Custom Request	184
Create the Orchestration	188
Test the Orchestration	193
Data Validation	196
Data Validation Example	196
Validate UDC Value Orchestration	196
Validate Item Number	204
Create Add Item with Validation Orchestration	205
Add a Rule to Evaluate Record Count	206
Create and Add Message Request	208
Add UDC Validation Orchestration	211
Add Rule to Evaluate UDC Validation Output	211
Add Form Request to Add an Item	213
Add Message Request	214
Define Outputs	216
Test Orchestration	217
Optional Exercise – Data Validation Exercise	222
Assertions	223
Assertions Overview	223
Defining Assertions	223
Assertion Example	226
Build the Form Request	227
Review Form Service Request Created with Process Recorder	230
Create the Orchestration	234
Test the Orchestration	241
Optional Exercise– Assertions	243
External Database	245
External Database Overview	245
About the Connector Design Page	247
Database Connector Example	248
Database Connector Example	249
Create the Orchestration	253
Validate Customer Number	254
Create Process Customer Record Orchestration	256
Add Logic Extension to Concatenate First and Last Name into Alpha Name	258
Add Rule to Evaluate Record Count	259

Add Update and Add Address Book Form Requests _____	260
Define Outputs _____	262
Complete the ProcessCustomerFromExternalDB Orchestration _____	263
Test the Orchestration _____	265
Complete Exercise 3 – External Database _____	266
REST Integration _____	267
REST Integration Overview _____	267
About the REST Connector Design Page _____	268
Add a Connector Request to Get the Current Exchange Rate _____	273
Create Orchestration _____	277
Add Data Request to Orchestration _____	278
Add Rule to Orchestration _____	280
Add Form Requests _____	280
Test the Orchestration _____	283
Appendix 1: Process File from Network Drive _____	285
Appendix 2: External CRM To S1 REST Integration _____	307
